Indicators & Data Collection Instruments

Program	YMCA Neighborhood Food Hub				
Type of Eval.	Outcome evaluation				
Evaluation Aim 1: To describe the reach and access of the Food Hub by program participants.					
Evaluation Questions	**Evaluation Design**	**Indicators**	**Data Collection Methods**	**Data Sources**	**Time Point**
1. To what extent has the Food Hub made high-quality food (fresh and nutritious) available for individuals participating in the program?	Mixed methods: qualitative and quantitative	Proportion of weekly inventory that is fresh as compared to processed (quantitative). Types of food offered at the Food Hub (qualitative).	**Observation** (Qualitative): staff members use a checklist to list specific foods available and fresh in each category. **Inventory Record Tracking** (Quantitative): staff members use an inventory tracking table to record the number of items in each food category.	Primary data is collected from weekly Food Hub observations, inventory, and categorization of food donations.	Weeks 2-4
2. To what extent has the Food Hub addressed the personal and cultural preferences of participants?	Quantitative	Percentage of participants reporting that available foods align with their personal or cultural preferences.	**Survey**: to assess how the Food Hub addresses the diverse needs of community members	Primary data is collected from participant responses to the survey.	Weeks 2-4
3. Why do participants return to the Food Hub?	Qualititative	Reasons reported by returning participants.	**Focus Groups**: to ask why participants return to the Food Hub.	Primary data will be key themes captured by feedback from focus groups.	Weeks 3-4

Evaluation Aim 2: To assess participants' experiences and perceptions of the Food Hub.					
Evaluation Questions	**Evaluation Design**	**Indicators**	**Data Collection Methods**	**Data Sources**	**Time Point**
1. What are participants' experiences with engaging with the Food Hub?	Mixed methods: qualitative and quantitative	Experiences of participants at the Food Hub (qualitative).	**Survey**: To ask participants what goes well and what barriers are faced with accessing the Food Hub. **Focus Group**: Open-ended exploration of participants' experiences at the Food Hub.	Primary data from participants captured in the survey. Primary data will be key themes extrapolated from the focus groups.	Weeks 2-4 Weeks 3-4
2. To what extent has the Food Hub supported participants including new or different foods in their diet?	Quantitative	Percentage of participants reporting that the Food Hub has helped them incorporate new or different foods into their meals.	**Survey**: To ask participants if the Food Hub helped them add new or different foods to their meals	Primary data comes from participants' responses to the survey.	Weeks 1-3
3. To what extent has the Food Hub supported the creation of a sense of community among the Food Hub participants?	Qualitative	Experiences of participants with social interactions with other Food Hub participants. Experiences of belonging reported by participants.	**Focus Group**: To gain a nuanced understanding of social interactions at the Food Hub and how the Food Hub is impacting participants' sense of community.	Primary data comes from the key themes on interactions/experiences of belonging from focus groups.	Weeks 3-4
