Suitability Analysis for Manufactured Home Communities in Tompkins County, NY

Candidate Parcels for Further Investigation

TompkinsOpportunityZones

Healthcare Facilities

2025 FEMA Flood Map

Flood zone

The map shows four candidate parcels in Tompkins County for potential manufactured home community development. These vacant parcels are larger than 50 acres, located within designated opportunity zones, within 10 kilometers of a healthcare facility, and do not intersect the mapped flood zones used in the analysis. The four parcels in Danby, Caroline, Dryden, and Lansing are recommended for further investigation. Additional review of zoning, infrastructure, and environmental conditions is needed before development.
